Backend Developer - Java | Spring Boot

PROFILE

Motivated Software Developer with strong hands-on experience in building scalable and secure web applications using Java and Spring Boot. Skilled in developing RESTful APIs, implementing authentication and authorization and designing efficient backend systems. Passionate about writing clean, maintainable code and delivering high-performance, production-ready solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL,
Backend: Spring Boot, Node.js, REST APIs, Spring Security
Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Next.js
Databases: MySQL, MongoDB, PostgreSQL
Tools & Dev: Git, GitHub, Docker, Postman, IntelliJ IDEA, VS Code
Practices: Test Driven Development, Agile Methodologies, Swagger

WORK EXPERIENCE

Software Engineer Intern

DEC 2024 – JUN 2025

ZeroCode Software (Pvt) Ltd, Kothalawala .

- Developed web applications using Spring Boot backend.
- Implemented REST APIs with Spring Security for authentication and authorization.
- Designed and optimized mySQL database schemas to improve application performance.
- Collabarate with cross-functional teams using Agile methodologies and participated in code.
- Contributed to technical documentation and onboarding materials.

SELECTED PROJECTS

LC -Payment System (Intern Project)

- Built a student management system handling attendance tracking and payment processing.
- Developed secure REST APIs using Spring Boot and Spring Security with JWT authentication.
- Implemented MySQL inside Docker containers for consistent development and testing environments.
- Implemented test-driven development (TDD) practices using JUnit and Mockito, covering both unit and integration testing, while maintaining code quality with SonarQube.
- Led a team of 4 developers, coordinating tasks and ensuring timely delivery.

AI-Powered Smart Glasses for Visually Impaired (Sri Lanka) -[Web Site](#) - [GitHub Repo](#) (Research Project)

- Developed an IoT-based Smart Glasses system using TinyML and Edge AI to assist visually impaired users with real-time face recognition, navigation, and Sinhala text reading.
- Built an edge-based architecture with Raspberry Pi 5 and Flask, enabling real-time, fully offline AI processing
- Implemented a Sinhala OCR system with voice feedback, allowing users to read printed materials through image-to-text conversion and text-to-speech synthesis.

- Developed an Android mobile application (Java 11) with voice commands, background services, Bluetooth connectivity, and accessibility features

Cherry Bay Cafe Management System – Spring Boot & Next.js

- Developed a full-stack cafe management system using Java, Spring Boot, REST APIs, MySQL, and Nextjs
- Implemented backend APIs for product, category, order, and loyalty management.
- Implemented CRUD operations, business logic, exception handling, and API integration.
- Used Docker for database development and environment management.

Travel & Tour Agency Website – MERN - GitHub Repo

- Developed Travel & Tour booking platform with user authentication and tour listing management.
- Implemented user login, booking workflows, and backend APIs
- Translated Figma UI/UX designs into responsive React components
- Collaborated within an 8-member team, contributing to both frontend and backend development
- Integrated MongoDB database for efficient storage and retrieval of tour and user information

Quick Task Manager – Spring Boot & React - GitHub Repo

- Developed a task management application with Spring Boot backend and vanilla JavaScript frontend.
- Built interactive dashboard using Chart.js to visualize task statistics and completion rates.
- Implemented REST APIs for authentication, task CRUD operations and custom exception handling.
- Achieved high test coverage using Junit and Mockito for unit and integration testing

Fitness App – Spring Boot (OAuth2) - GitHub Repo

- Built secure fitness tracking API using Spring Boot and OAuth2
- Implemented user authentication and profile management
- Developed workout tracking and management features
- Designed RESTful APIs for scalable backend services

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT) , Sri Lanka

SEP 2021 – MARCH 2026

G.C.E. Advanced Level – Physical Science Stream

KG/Thalduwa Buddhist College-Avissawella

2016 – 2020

- Subjects: Combined Mathematics, Physics, Information Technology.

Diploma in English Language and Literature

Aquinas College of Higher Studies,Hanwalla

2025– Present
